Summary

View my source code on Github

Hi, Im Tran Hoang Thien, a two-year experience Developer specializing in Front-end web and Mobile development. In the process of working, I get figma from design , then break it into pieces so that it can be reused next time.

Skills

Collaborate: Vs Code | Yarn | Prettier | Git Flow | Figma | Discord

I took the design from the designer's Figma, analyzed and divided the project into tasks and divided among the team members using excel, Trello/Discord. Then I created the codebase with plugins like Yarn, Husky, lint-staged, Prettier, Git Flow to ensure uniformity in a collective.

Styling: Flex Grid Tailwind CSS Material UI styled components

I can create beautiful responsive designs with the help of various UI libraries.

React/Next: Typescript React NextJs Format.JS Rest API Redux Toolkit React query React Hook Form Context PWA Studio

I have developed many websites using NextJS/React + Typescript, using Redux Toolkit for state management, communicating with Rest API to get data.

Experience

Legato Technologies Limited

- **05/2023 - current**
  Role: Front-end
  Resoures: 3 members (FE)
  Knowledge achievement: Next JS, React Hooks, Redux-toolkit, Material UI, REST API, Git extension, SEO
  Project: Hotel booking website
  The main task: Set up the code base, build the project from scratch, develop and assist the debugging team

- **01/2023 - 05/2023**
  Role: Front-end
  Resoures: 2 members (FE)
  Knowledge achievement: Next JS, React Hooks, Redux-toolkit, Material UI, REST API, Git extension, Drag and Drop
  Project: Website to manage the garage's repair schedule
  The main task: Set up the code base, build the project from scratch, develop and assist the debugging team

- **11/2022 - 01/2023**
